## Endwall logistic system

### Who

Film producer (PET, OPS, BOPP, OPP)

### Problem

To meet various transport demands – reusable, one-way, dust free, water resistant - our customer had a tremendous warehouse and packaging effort by having hundreds of pallets of different packaging material on stock.

### Solution

Our Endwall Logistic Systems enables customer using less amount of packaging materials to ship any kind and dimension of rolls. Film rolls are well protected and can be sent without pressure marks by hanging transport in-between the endwalls.

Endwall light for lighter rolls (up to 150 kg) as inexpensive and clean one-way transport/storage system.

### Result

Hugh cost saving by reduction of inventory, increase of reusability rate, less packaging man power. The film roll arrive save at end user with no transport damage.
